### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: \_\_\_\_\_.

## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 1-19 are objected to because of the following informalities: A majority of the claim language is generally unclear. For example, such wording such as "is realized" is not common claim language and it is unclear as to exactly what is meant by this specific language. It is at times difficult to understand what structure is being claimed versus the functional language as well. It is suggested that the claim language be amended to further clarify the invention.

2. Claims 16 and 18 are objected to because they appear to have method steps in apparatus claims. It is pointed out that these claims are not limited to the manipulations of the recited steps, only the structure implied by those steps. The patentability of a product does not depend on its method of production.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Petrusa (5,376,080). Petrusa discloses applicant's basic invention substantially as claimed. He discloses a disposable syringe (any syringe can be disposed of) with a retractable needle (figure 2), a piston 15 and gasket 18, a lip (outer edge distal of structure 13 in figure 2), a needle carrier socket element (neck of reservoir), a seat 36, a

double hook element (40-42), a spring 12, a coupling hinge 117, longitudinal cuts and lateral lugs(fig 13a-13c) , the central element having a hollow cylindrical shape (fig 1), the seat having a knee shape (117 column 4 line 25). Petrusa discloses the device wherein the needle carrier socket element remains blocked as claimed (figures 11-13.)
